Popular, "Scientific", Rational,
insufficient? ~ Darwinism

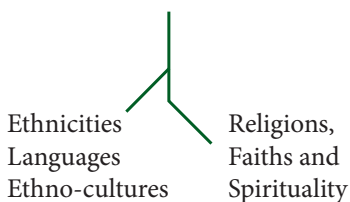

Where this could, possibly, lead...

*"...man is a bundle of relations, a knot of roots,

HUMAN SOCIETY?

Clubs, restaurants, theatres, factories, offices, shops,
schools, homes and family life.

In many contemporary societies people hope for
full employment and a clean environment.

Nationalities, Ethno-cultures and
Languages are widely and variously
expressed in Human Societies.
In would-be "open" societies should
some efforts be made to also
accommodate any longstanding
minority communities?

Emerson's insight could well be valid!!!
